PANAMA AMONG THE NATIONS.

FULLY RECOGNIZED IN RECEP-TION TO HER MINISTER.

Building of Isthmian Canal Referred To in Speeches of President Roosevelt and Mr. Bunau-Varilla-French Ambassador Also Receives New Minister.

WASHINGTON, Nov. 13.-The new Republic of Panama was received into the sisterhood of nations this morning when Philippe Bunau-Varilla presented to President Roosevelt his credentials as Minister Plenipotentiary and Envoy Extraordinary. These credentials came by telegraph from the Junta of the de facto Government at Panama but were regarded by the State Department as sufficient to justify the reception of the new Minister as a fully accredited diplo-

matic representative.
Shortly after 9 o'clock Mr. Bunau-Varilla arrived at the State Department from his hotel and was met by Secretary Hay in the diplomatic reception room. They entered Mr. Hay's carriage and drove to the White House, where, at 9:30 o'clock, the presentation took place. The Minister was received in the Blue room, the ovalshaped apartment where the President, on the few occasions that he is called upon business with members of the diplomatic body.

Secretary Hay performed the introduction briefly, and Mr. Bunau-Varilla then handed the President his credentials and made a formal speech, in which he said:

maded the Fresident his credentials and made a formal speech, in which he said:

Mr. President: In according to the Minister Plenipotentiary of the Republic of Panama the honor of presenting to you his letters of credence you admit into the family of nations the weakest and the last born of the republics of the New World.

It owes its existence to the outburst of the indignant grief which stirred the hearts of the citizens of the lathmus on beholding the despotic action which sought to forbid their country from fulfilling the destinies wouchsafed to it by Providence.

In considering its right to exist, Mr. President, you put an end to what appeared to be the interminable controversy as to the rival waterways, and you definitely inaugnate the era of the achievement of the Panama Canal. From this time forth, the determination of the fate of the canal depends upon two elements alone, now brought face to face—singularly unlike as regards their authority and power, but wholly equal in their common and ardent desire to see at last the accomplishment of the heroic enterprise for piercing the mountain barrier of the Andes.

The highway from Europe to Asia, follow—

The highway from Europe to Asia, following the pathway of the sun, is now to be realized.

The early attempts realized.

The early attempts to find such a way unexpectedly resulted in the greatest of all historic achievements, the discovery of America. Centuries have since rolled by, but the pathway sought has hitherto remained in the realm of dreams. To-day, Mr. President, in response to your summons, it becomes a reality.

The following was President Receivedt's

The following was President Roosevelt's MR. MINISTER: I am much gratified to

receive the letters whereby you are accredited to the Government of the United States in the capacity of Envoy Extraordinary and Minister Plenipotentiary of the Republic of Parameters. the capacity of Envoy Extraordinary and Minister Plenipotentiary of the Republic of Panama.

In accordance with its long established rule, this Government has taken cognizance of the act of the ancient territory of Panama in reasserting the right of seif-control, and, seeing in the recent events on the Isthmus an unopposed expression of the will of the people of Panama and the confirmation of their declared independence by the institution of a defacto Government, republican in form and spirit, and alike able and recovered so discrarge the obligations pertaining to sovereignty, we have entered into relations with the new republic.

It is fitting that we should do so now, as we did nearly a century ago when the Latin peoples of America proclaimed the right of popular government, and it is equally fitting that the United States should now, as then, be the first to stretch out the hand of fellowship and to observe toward the new horn State the rules of equal intercourse that regulate the relations of sovereignities toward one another.

I feel that I express the wish of my countrymen in assuring you, and through you the people of the Republic of Panama, of our

assuring you, and through you the of the Republic of Panama, of our thope and desire that stability and earnest hope and desire that stability and prosperity shall attend the new State, and that, in harmony with the United States, it may be the Providential instrument of untoid benefit to the civilized world through the opening of a highway of universal commerce across its exceptionally favored territory. For yourself, Mr. Minister, I wish success in the discharge of the important mission to which you have been called. The response of the President concluded the formalities. The President and Mr. Bunau-Varilla engaged in some pleasant personal conversation for a few minutes. Mr. Bunau-Varilla then withdrew.

Soon after his reception by the President Mr. Bunau-Varilla requested that M. Jusserand, the French Ambassador, receive him. The request was granted and the light of the property of the prop him. The request was granted, and the Minister of Panama was cordially greeted. M. Jusserand will return the call when he has been notified officially of the recogni tion accorded by his Government to

I am interpreting faithfully the sentiments of the Government and of the people of the Republic of Panama in directing my first steps toward France after the consecration of the republic as a sovereign and independent state. WASHINGTON, Nov. 13 .- Additional information in regard to the work of the officials of the War Department on plans to get an expeditionary force of troops ready for service in the Isthmus of Panama, should the occasion arise for sending soldiers there, in the State was the one who proclaimed was obtained at the War Department to-day. Lieut.-Gen. Young said to-day that the subject of sending troops to the Isthmus came up for the first time in the office of the Chief of Staff of the army. Among the officers present were Gen. Young and Brig.-Gen. Thomas H. Barry. No definite plans were made at the time, but there was an expression of opinion as to the size of an expression of opinion as to the size o the force that might be required in case of war with Colombia, and Gen. Young said that he thought 25,000 troops would do to

that he thought 25,000 troops would do to cope with Colombia.

This conversation was the beginning of considerable activity on the part of the Supply Bureau of the army. It was determined to make every possible preparation for the sending of troops. Quartermaster-Gen. Humphrey sent instructions to the Depot Quartermaster in New York to make arrangements for placing the transport McClellan in commission and to instruct Capt. Nye, the master of the ship, to get a Capt. Nye, the master of the ship, to get a

crew ready.

Gen. Young explained to-day thati t was the duty of the heads of the bureaus to take into consideration the situation on the Isthmus and do what they thought best to Isthmus and do what they thought best to be prepared. Such action would be taken, he said, as a result of the knowledge of conditions of the Isthmus, and it would require no special orders from the President or Secretary of War for the supply officers to get ready. In fact, he thought it was the duty of these officers to be ready, and he supposed that the activity in army circles was due to a determination to be prepared. He did not know, he added, how some of the officers had received the idea that they were to make special preparation for an were to make special preparation for an expeditionary force for six battalions of four companies each. He had not given orders, and had merely discussed the matter with some of the officers on duty in

PLOT TO FLEE FROM ASYLUM. One Boy Did Get Out-Bars Sawed With Home-Made Files.

The West 152d street police last night sent out an "alarm" for fifteen-year-old William McKay, who escaped from the New York Juvenile Asylum, at 176th street and Amsterdam avenue, on Tuesday. That s how the story of an unsuccessful attempt of twenty-five or thirty other boys to escape on Monday became public.

The boys, who were bent on getting away, according to the police, had obtained a number of knives and spoons and by hard work succeeded in making files, with which they sawed through a number of hars on the third floor of the dormitors on the Audubon avenue side of the grounds

The work of preparation, it is said, was done under the ringleadership of young McKay, who is regarded as almost rigible and who had already escaped from the institution twice. The wholesale delivery was planned for Monday night, but according to the police, five of the boys who had joined in the plot kicked over the traces at almost the last moment and sent one of their number to Supt. Hillis with the whole story.

On Monday evening five guards wen to the third floor of the dormitory, found the severed bars had been cut through and at once moved a number of the boys to cells. Several of these boys feigned sleep, the guards say.

Young McKay was put in a cell by him self and was last seen there at 3 o'clock on Tuesday afternoon. At that time the guards say, his cell was securely locked. Half an hour later the cell was found empty. The lock had been smashed and the door

The guards were unable to find young McKay and the police were notified. They kept the matter quiet till last evening.

But Passenger Trains Won't Be Run Till Spring, Parsons Says.

Chief Engineer William Barclay Parsons of the Rapid Transit Commission said yesterday that the subway from City Hall to 104th street would be completed some ime next month. He said:

"It is not generally known how nearly ve have approached the completion of the tunnel in Manhattan. With the exception of a few short gaps we have the tunnel nearly finished, and tracks have been laid for the greater part of the distance between Walker street and Seventy seventh street. Farly next month we will have an unbroken line of tracks laid through the subway from the City Hall to 104th street."

Mr. Parsons said that not later than farch or April the tunnel would be open

for regular passenger traffic. Asked why, if it would be possible run experimental trains next month, it would be necessary to wait for three months or more before the carrying of passengers was begun. Mr. Parsons said: "For one thing, the power house is not

completed. The company can purchase enough power for experimental trains, but not for regular traffic. Also, time will be required for testing the road and signals and for breaking in the men who will operate the trains." Mr. Parsons did not sav how soon sur-

ace conditions along the route of the tunnel would be restored. This part of the route is being done so slowly that several sufferers along the highway of bankruptcy n Forty-second street were talking veserday of suing the city.

SLAYER GLORIES IN HIS DEED.

Woman Ruined Him, He Says, and Mr. Green Protected Her.

The Most Public Spirited Citizen in New

Andrew H. Green, in whose brain the dea of a greater New York than that within the confines of Manhattan Island first originated, and who, with the late Abram B. Hewitt, was foremost in every move for the betterment of the city, was murdered at his own door yesterday afternoon by Cornelius Williams, a middle-aged negro, whose unbalanced mind had conjured up a grievance against the aged

Two shots were fired into Mr. Green's body, and either of them was serious enough to have killed him. Three others aimed at him by the murderer went wide, but before they were fired at all the accessination had been accomplished and Mr. Green lay dead on the ground, his assailant standing over him, revolver in hand, pouring out the vilest curses at the body.

The negro had walked by his side to the door of the house, raving of his imagined wrongs, and Mr. Green, slightly out of patience with such persistency, placed his hand on the man's shoulder and asked him in a kindly tone please to go away. For answer, Williams whipped out a heavy revolver and fired the shots which laid one of the foremost of American citizens dead at

his feet.
